PROJECTS

SetTracker — Full-Stack Workout Tracking App | Next.js/React, TypeScript, Node/Express, MongoDB | 2025-Present | [Watch a demo video here.](#) | [Try the demo here.](#) | [GitHub Page](#)

- Deployed a full-stack Next.js/React + Node/Express app with secure auth, REST APIs, and responsive UI; shipped iterative fixes based on production defects and regression checks.
- Implemented email verification + password reset flows and protected routes.
- Wrote unit/integration tests for backend models/controllers using Vitest.
- Designed data models and query patterns to support exercise history, time-window filtering, and analytics views.
- Built reusable UI components and optimized mobile-first UX for rapid workout logging.

Travl'r Getaways (Academic Project) — MEAN Stack Web App | 2025 | [GitHub Page](#)

- Developed a travel booking web app using Angular and Express with REST endpoints and MongoDB persistence.
 - Implemented JWT-based admin authentication and protected routes to secure management workflows.
 - Built responsive UI screens and integrated front-end forms with backend services.
